SUMMARY

I am a junior software engineer, passionate about clean code, user-centered products, & solving problems. While actively sharpening my skills, I am currently looking for my next challenging role where I can learn and progress on professional and personal levels.

In addition to completing an intensive coding bootcamp, my academic background lies in cognitive science. This combined with my natural curiosity and a multi-cultural background helps me to be a natural team player, that leads to creative & collaborative solutions.

EXPERIENCE

FULL STACK WEB DEV PROJECTS

SPICED ACADEMY, Berlin, Germany | Aug 2020 – Nov 2020

- **Social Network:** Where a user can create a profile, reset the password, update the profile, with a pic and bio. The network allows to add and delete friends from the network database and receive notifications.
Tools: Front-end: React, Redux, Axios Back-end: Express, Nodejs, PostgreSQL, AWS, S3
- **ImageBoard:** A static page that doesn't need to reload. It is an image collector where a user can upload a picture and leave a comment. By clicking on a single image, opens a modal and the user can comment selected image and it will be updated in real-time.
Tools: Front-end: Vue.js, Axios Back-end: Express, Nodejs, PostgreSQL, AWS, S3
- **Spotify Api:** A user has a chance to choose his/hers favorite artists or his/hers favorite songs with a limit of 20 items. API request, with Ajax and jQuery.
Tools: jQuery, Ajax, Vanilla Javascript
- **Connect 4:** A game where you play against another player and you have to connect 4 tokens of the same color. When token color matches, the tokens disappear.
Tools: Vanilla Javascript, CSS, HTML
